

Liste des posters

P01. Immunomodulatory potential of bacteria isolated from human breast milk on different cellular models.

Charles LE BRAS

P02. Impact of neonatal digestion on the physiology of breast milk bacteria and their immunomodulation capacities.

Alizé MOUCHARD

P03. The genomic basis of the *Streptococcus thermophilus* health-promoting properties.

Aurélie NICOLAS

P04. Study of quorum sensing in *Propionibacterium freudenreichii*.

Alicia MONTFORT

P05. Oral administration of a probiotic combination improves postprandial triglycerides and decreases fat storage in high fat diet-induced metabolic syndrome in mice.

Elsa JACOUTON

P06. Maturation of sour beer: how to select a *Pediococcus* bacteria unable to produce biogenic amines?

Valentine GUICHOUX

P07. Can lactic acid bacteria persist in the oral cavity after eating fermented food?

Hélène LICANDRO

P08. Impact of pediococci on the amino acid profile of a model-cheese with propionic acid fermentation.

Ueli VON AH

P09. Revealing the microbial heritage of traditional Lebanese goat milk fermented products *Pierre RENAULT*

P10. Diversité microbienne et viabilité cellulaire de levains ambiants utilisés en technologie fromagère Comté.

Jade LUTIN

P11. Functional strain redundancy and phage resistance diversity in Swiss raw mixed cultures. *Ueli VON AH*

P12. Expanding the repertoire of lytic phages infecting the wine lactic acid bacterium *Oenococcus oeni* and proposal of a new genus '*Krappator*'

Claire LE MARREC

P13. Fermentation de sève de bouleau : dynamiques microbienne et métabolique.

Marie-Hélène DESMONTS

P14. Potentiel d'*Aerococcus* sp. pour la conservation des aliments : exploration du spectre antimicrobien sur matrices modèles et du mécanisme d'action.

Margot SCHLUSSELHUBER

P15. Bio-préservation de fraises grâce à des produits végétaux fermentés par des bactéries lactiques.

Clarisse BRÉARD

P16. A T7SS effector of *Lactococcus piscium* is involved in the contact-dependent growth inhibition of *Listeria monocytogenes*.

Ombeline GUIGUIN

P17. Tailoring starter cultures for plant-based dairy alternatives, focus on their effects on the curdling capacity of soy drink.

Blandine GENET

P18. Incidence and impact of lysogeny on the physiology of malolactic starters.

Amel CHAÏB

P19. Étude du potentiel de production d'exopolysaccharides de souches de bactéries lactiques isolées de fromage au lait cru .

Karine FAYOLLE

P20. Acidification kinetics interactions between Lactococci Protease Positive and Lactococci Protease negative strains to design cheese starter cultures.

Pascal FOURCASSIÉ

P21. Bactéries lactiques pour des boissons fermentées non alcoolisées à base de pommes.

Marina CRÉTENET

P22. Development of a method to screen Lactic Acid Bacteria Beta-Glucosidases involved in the presence of Volatile Compounds of Fermented Vegetables.

Socheata MAO

P23. CRISPR in the *Oenococcus* genus.

Claire LE MARREC

P24. Omnicrobe : une base de données d'habitats et de phénotypes microbiens.

Hélène FALENTIN.

P25. Who is in? Identification of bacterial strains by Nanopore sequencing and use of ORI software.

Émeline ROUX

P26. Le Réseau Mixte Technologique FLOREPRO

« Place des cultures de préservation dans la durabilité des filières : interactions dans les écosystèmes, modes d'action, traçabilité, efficacité et qualité des aliments »

Monique ZAGOREC

P27. La plateforme GeT : des applications en génomique et transcriptomique pour l'étude des micro-organismes.

Étienne RIFA

P28. Genetic toolbox for *Lactobacillus* engineering

Elsa FRISTOT

P29. Fermentation de *Chlorella vulgaris*, microalgue utilisée en alimentation humaine, par souches de bactéries lactiques.

Victoria CHUAT.

P30. Potential of microorganisms to decrease the "beany" off-flavor.

Estelle FISCHER

P31. Improvement of 3-hydroxypropionic acid bioproduction by *Limosilactobacillus reuteri* DSM 17938 using response surface methodology.

Catherine BÉAL

P32. Nutritional improvement of germinated seeds by LAB fermentation.

Koffigan KPONOUGLO

P33. How microbes could be a tomorrow's pillar of plant nutrition.

Florent LE BROCC

P34. Carbon metabolism in *Streptococcus thermophilus*: regulation and diversity within the species.

Françoise RUL

P35. *Streptococcus thermophilus* in soya milk: growth and metabolic activity.

Françoise RUL

P36. In *Streptococcus thermophilus*, ammonia from urea hydrolysis paradoxically boosts acidification and reveals a new regulatory mechanism of glycolysis.

Stefania ARIOLI

P37. Structure activity study of lacticaseicin 30, a bacteriocin with promising applications.

Françoise COUCHENEY

P38. Lactic acid fermentation modifies pulses technological functionalities: State of the art.

Fanny CANON

P39. A multiple screening approach to isolate efficient LAB strains for new functional foods

Chi NGUYEN

P40. *Conception de dispositifs de microfluidique pour l'étude des mécanismes d'interactions entre bactéries du cidre.*

Simon BEGREM

P41. La vie sociale des bactéries lactiques : une histoire de peptides.

Véronique MONNET

P42. Swiss Center of Excellence for Raw Milk Products.

Ueli VON AH
